INTERNAL · EDITION 01 · JULY 2026

The Field Guide.

Everything a New Home Dispatch reporter needs to know: who we are, how the machine works, how to work a community, how to talk to people, and where everything lives. Read it once, carry it always.

Look Closer.

newhomedispatch.com/team/toolbox.html

HOW TO USE THIS GUIDE

Contents.

Pages 3 and 4 are the why. Pages 5 to 7 are what we publish. Pages 8 to 10 are the field manual, read them before your first route. Page 11 is how we talk to people. Pages 12 to 14 are systems, rules, and your first week. Every link in this book is clickable.

01	Who we are, and who we are not	3
02	The machine: how the verified tape works	4
03	The products: what we publish every day	5
04	The Deal Record and the Share Kit	6
05	The buyer tools directory	7
06	Field operations I: before you drive	8
07	Field operations II: at every stop	9
08	Field operations III: filing and closeout	10
09	Conversations: sales offices and buyers	11
10	Internal systems and where everything lives	12
11	Rules that never bend	13
12	Your first week, and the glossary	14

The one-page version: we verify what builders advertise, four times a day, and we go look in person. Advertised is a claim until verified. Buyers get the research free. When they want representation, that is Seider Realty Team, and the research and the revenue never touch.

SECTION 01

Who we are, and who we are not.

New Home Dispatch is an independent consumer intelligence platform for new residential construction, starting in Austin and Central Texas. Think Consumer Reports for new construction: original reporting, structured data, historical tracking, field observation, and practical tools that help buyers make dramatically better decisions.

We are not

- A brokerage website or a lead funnel dressed up as journalism.
- A builder directory or a marketing platform. No builder pays to appear, ever.
- A content farm. Every number is dated, sourced, and labeled by confidence.

The two-company structure, in one breath

New Home Dispatch is the research. **Seider Realty Team powered by The Ascend Group at LPT Realty** is the representation business. The research is free for every buyer and never requires hiring anyone. When a buyer wants hands-on help touring, negotiating, and closing, that is the Seider Realty side. The wall between them is stated publicly on the site and it is real: rankings cannot be bought and findings cannot be suppressed.

Independence, in writing (memorize this): Builders advertise. We verify. Rankings cannot be bought and findings cannot be suppressed. Every figure is checked against the builder's own site four times a day, dated, and sourced.

Why this wins

Zillow shows listings. Builder sites show marketing. Nobody else maintains a verified, time-stamped record of what builders advertise, how their deadlines actually behave, what districts really tax, and what buyers actually negotiated. That archive compounds daily and cannot be copied backwards. Your field work is what turns "advertised" into "verified," and that upgrade is the most valuable thing this company produces.

The voice

Practical, evidence-based, professionally skeptical, warm to buyers, and never promotional. We write plainly. We label claims as claims. We publish corrections openly. And we never use em dashes in anything buyer-facing; commas and periods read human.

SECTION 02

The machine: how the verified tape works.

Four times a day, at 6:30a, 10:30a, 2:30p, and 6:30p Central, an automated sweep checks every tracked builder offer against the builder's own website, recomputes the Concession Index and the Buyer Advantage Score, passes a consistency gate, and publishes itself to the live site. After every sweep, six social cards and channel captions render automatically, and twice a day everything is delivered to Google Drive. No human touches this loop; your job is to feed it better data than any website can.

ASSET	WHAT IT IS	WHERE
The registry spine	45 tracked builders, 38 communities, taxes, HOA, districts	entities.json
The verified tape	Every advertised offer with history, deadlines, lender ties, confidence	incentives.json
Buyer Advantage Score	0 to 100 read of who holds leverage; above 65, buyers lead	score-history.json
Concession Index	Median advertised credit across the tape	concession-index.json
Content packet	Each sweep's facts, changes, interpretation, and publish call	reporting/content-packet.json

Confidence tiers, lowest to highest

BUILDER ADVERTISED what the website claims. **REPORTED** re-verified against the source. **FIELD VERIFIED** confirmed in person, in writing, by us. Everything you capture on a route exists to move numbers up this ladder.

Also feeding the system

Freddie Mac weekly mortgage benchmark, City of Austin permit counts, published resale market statistics, and, pending one license token, a daily MLS aggregate digest. Public pages never show listing-level MLS data until licensing is answered in writing.

Why four times a day matters: deadlines, price cuts, and quiet offer swaps happen between mornings. The sweep catches the micro moves, and the archive of those moves is the moat.

SECTION 03

What we publish, every day.

PRODUCT	WHAT IT DOES AND WHY BUYERS RETURN
Homepage newhomedispatch.com	Live intelligence at a glance: status bar, Today's Buyer Snapshot (score, changes, rate reality, nearest deadline), and the path into every tool. Different every visit, on purpose.
Daily Hot Sheet /daily-hot-sheet.html	The Buyer Decision Terminal: one score, what changed since the last sweep, today's one move, and the market board. Reads in under a minute on a phone. The daily anchor product.
Incentive Tracker /incentive-tracker.html	The searchable tape: every tracked offer ranked by what actually reaches the buyer, with trends, expirations, lender ties, and district tax context.
Community Explorer /communities.html	38 communities compared on the numbers that decide the real payment: combined tax rate, MUD or PID, HOA, and who builds there.
Weekly Dispatch /weekly-dispatch.html	Friday narrative: the week's moves, field notes, and what they mean. The email edition drives the return habit.
Buyer Playbook /buyer-guides.html	Sixteen chapters by buying stage, free to read and download. The education backbone everything else stands on.
Reports /reports.html	Original reporting: the entry level price floor, roadway and infrastructure tracking, and the series your field work creates.

How to explain the Hot Sheet in one sentence: "One number tells you who holds leverage today, and one line tells you what to do about it, verified four times a day."

SECTION 04

The Deal Record and the Share Kit.

The Deal Record: advertised vs achieved

The newest and most defensible dataset we own. Buyers who just closed report what they actually negotiated at newhomedispatch.com/report-a-deal.html, a three minute, mostly-taps form. Submissions email Pete and land in Netlify Forms for verification.

- **Verification path:** sanity check against the archive, concession cap check by financing type, assign the evidence label, redact documents, publish at community and month level only.
- **The statistics gate:** no averages or percentiles are displayed until five or more comparable deals exist for a builder or community. Small samples mislead; we do not publish them.
- **Your part in the field:** every buyer conversation is a chance to mention the record. "What you actually got helps the next buyer, three minutes, anonymous."

The Share Kit: social, always current

Every social asset lives on one page: newhomedispatch.com/share-kit. The six live cards and The Board single sheet regenerate automatically after every sweep, caption copy comes with a copy-all button, and the Dispatch Rule reel and education slides sit beside them. The same files land in Drive at 7am and 7pm daily. If you post, pull from here and only here; it is never stale.

Print and one-sheets

The Board is the shareable market single sheet. Community one-sheets and the Deal Comes Last one-pager live with collateral in Drive. Everything a buyer sees must carry its date; nothing undated leaves the shop.

The Dispatch Rule, our editorial signature: the deal comes last. Numbers earn a home the right to be considered; the heart decides which one is yours. When the numbers tie, use the head and heart test at [/deal-comes-last.html](https://newhomedispatch.com/deal-comes-last.html).

SECTION 05

The buyer tools directory.

All free, no email walls on education. When a buyer asks a question, your answer usually ends with one of these links.

TOOL	USE IT WHEN A BUYER ASKS
True Cost Calculator	"What will I really pay per month?" All-in payment with taxes, MUD or PID, HOA, insurance, maintenance.
Incentive Reality Calculator	"Is this \$25K incentive actually worth \$25K?" Almost never; this shows what reaches them.
MUD & PID Atlas	"Why is the tax rate 3.3%?" District by community, plus how to verify their exact lot with TCEQ.
Negotiation Window	"When should I make my move?" Builder fiscal quarter clocks plus live deadlines from the tape.
Who Owns the Neighborhood	"Who am I actually buying from?" Ownership research.
Affordability Desk	"Where does new construction actually start?" The verified entry level price floor.
Dare to Compare	"Which offer is better?" Side by side, same plan where possible.
Zero Out of Pocket	"I do not have much cash." Low cash-to-close paths, honestly framed.
Down Payment Assistance	"Is there help for the down payment?" Program guide.
Texas Tax Reality Guide	"Why did my payment jump after year one?" Escrow, reassessment, the five numbers to verify.
Look Closer Checklist	"What should I check on a visit?" It is also your field inspection list.
Incentive Watch	"Tell me when my builder moves." We message them the moment their number changes.
Start Here · First Time Buyers	"I am new to all of this." The front doors.

SECTION 06 • THE HEART OF THE JOB

Field operations I: before you drive.

Why field work is the moat

Anyone can scrape a website. Nobody else stands in the community, counts the standing inventory, photographs the incentive sign, and gets the real deadline in writing. Every verified fact you file replaces a "tracker" or "advertised" figure on the live site the same day, and the archive of those upgrades is what no competitor can rebuild.

Set up your phone once

1. Open newhomedispatch.com/team/ and add it to your home screen (Safari: Share, Add to Home Screen. Chrome: menu, Add to Home screen).
2. Do the same for the current route page, for example [/team/route-01.html](#): every stop as a tap-through card with Navigate, File Visit, and Mark Logged.
3. Read [/how-we-evaluate.html](#) before your first field day. It is the standard every observation must meet.

The kit, every stop, no exceptions

- **Photos, the floor:** the entrance, the amenity, one ordinary street, and every incentive sign you can see. Flagship first visits get the full package.
- **Paper:** the price sheet or flyer. Photograph it before you leave the office.
- **Counts:** quick move in homes, from the sheet or by asking.
- **Charge and offline:** full battery, and if signal dies, capture anyway; the tools have a copy-and-text fallback.

Plan the route the night before. Time sensitive stops go first; an advertised deadline you can witness expiring is reporting gold. Check the route page's priority flag and the Hot Sheet's nearest-deadline line before you sleep.

SECTION 07

Field operations II: at every stop.

The three questions, in writing, every office

1. **What is the current incentive and its real deadline?** Not the poster, the paper.
2. **Does it require your lender?** The lender tie changes what an offer is worth.
3. **Will you honor the posted offer if it has expired?** The answer, either way, is data for the deadline credibility series.

The observation formula

Every observation is written as **WHAT + WHERE and SCOPE + NUMBER + HOW YOU KNOW**, then tagged:

VERIFIED you counted it, photographed it, or hold the document **BUILDER CLAIMED** a rep or flyer said it **NEEDS VERIFICATION** conflicting or verbal only

Good: "Six completed spec homes on Serene Way, two with price improved riders, counted and photographed." **Bad:** "Lots of inventory sitting." No number, no location, no evidence, no use.

What to verify at the office

- The advertised offer against our tracker figure. Any difference is a finding, not an error.
- The combined tax rate and the district, MUD or PID, in writing from the disclosure. This feeds the Atlas.
- HOA dues, entry pricing, and which plans the advertised floor actually applies to.
- Expired offers still on display. That is the expired-but-displayed flag and we track it by builder.

Conduct: be exactly who you are. If asked, you research new construction offers for New Home Dispatch and you are a licensed agent with Seider Realty Team powered by The Ascend Group at LPT Realty. Never misrepresent, never covert-record, never rush a counselor who is with a customer. Courtesy is part of the brand.

SECTION 08

Field operations III: filing and closeout.

File before you drive away

1. Tap **File Visit** on the route page, which opens the [Community Visit Summary](#). The community and date auto-build the Visit ID.
2. Attach photos and tag each with Location and Subject; the tool names them to the media standard. Rename your camera originals to match before final filing.
3. Tap **Send to HQ**. It files centrally with a structured payload and emails HQ. No signal? Tap **Copy** and text it; nothing is lost.
4. Mark the stop logged on the route page and drive on.

When you get a specific number for a specific home

A rep, rate sheet, or contract quoting a real figure for a real house is the most valuable capture in this company. Open **Concession Verification** (team hub), pick the advertised offer, enter what was actually offered, and file the emitted entry to the concession reality ledger. Photograph the rate sheet and reference it. A rep merely repeating the website number is corroboration, not a ledger entry.

Closeout, within 48 hours

- Full write-up filed, photos named and delivered to Drive (02 - Field Reporting).
- Registry corrections flagged, like a community listed in the wrong city.
- Nothing publishes without passing the verification gate. Verified figures replace tracker figures on the site, the Atlas, and the community pages the same day.

One visit feeds six surfaces

The profile's Latest Field Visit block · the Weekly Dispatch field note · the Field Report · a dataset row · a Look Closer social post · and, when you verified a real number, a ledger row. Capture once, publish six times. That is why the discipline matters.

Media rules: never publish consent-restricted media showing identifiable people. Original reporting photos only, dated and captioned. Never builder marketing shots.

SECTION 09

Talking to people.

With buyers: educate first, always

You are a reporter and an educator before you are anything else. Answer the question in plain language, then hand them the tool that proves it. Never open with representation. The progression takes care of itself: they read the Hot Sheet, run their numbers, compare communities, watch their builder, and when they want a human in their corner, that conversation happens at </buyer-strategy-call.html>.

- "Is this a good deal?" Run it through the Incentive Reality Calculator together, then check the builder's history on the tracker.
- "The flyer says 3.99%." Ask: fixed or first year? Whose lender? What is the real deadline? Then show the Negotiation Window.
- "The payment seems low." Open the True Cost Calculator and add the district tax. That conversation earns trust for life.
- Just closed? Invite them to the Deal Record: three minutes, anonymous, helps the next buyer.

With sales counselors: professional, transparent, repeatable

Introduce yourself once, honestly. Ask the three questions. Take the flyer. Thank them. You are building a long relationship with every office in this metro; the rep who trusts you today hands you the rate sheet tomorrow.

The affiliation line, verbatim, whenever affiliation matters

"Seider Realty Team powered by The Ascend Group of LPT Realty." Bylines are real names. TREC information about brokerage services is linked in the site footer at </iabs.html>.

What we never say

We never trash a builder; we publish what we verified and let the record speak. We never promise outcomes. We never present advertised numbers as facts. And we never pressure anyone; the entire brand is the absence of pressure.

SECTION 10 · INTERNAL ONLY, NEVER SHARE THESE LINKS

Where everything lives.

SYSTEM	WHAT AND WHERE
Team Toolbox · the front door	Every page, tool, dashboard, and system on one filterable page: newhomedispatch.com/team/toolbox.html . Add to your home screen first.
Team hub	/team/ · field tools, production board, command center, concession verification.
30-Day Validation Dashboard	/dashboard.html · the four products, weekly GA4 metrics calculator, launch checklist, MLS digest panel.
Analytics tracker (GA4)	analytics.google.com · property New Home Dispatch, tag G-120VH1FFY7. Terminal views, watchlist adoption, ladder clicks, subscriptions.
Google Drive HQ	New Home Dispatch - HQ · topic folders 01 to 99. Open the 00 INDEX PDF at the top; field notes file to 02 - Field Reporting.
Deal Record inbox	Netlify Forms , deal-report · every submission, plus email to Pete.
Deploys and code	GitHub newhomedispatch-site auto-publishes via Netlify . Sister site repo: PeteSeider-Website-GITHUB.
Automations	GitHub Actions run the four-times-daily sweep and card renders; the NHD Automations Apps Script delivers to Drive at 7am and 7pm and rebuilds the Drive index and this guide's pocket edition.
Email and SMS	MailerLite for the Dispatch lists; Twilio functions for check-ins.

The standing order, for anyone who changes anything: ship it, deploy it, confirm live that nothing broke, update the Toolbox, guides, and Drive index, and put what others need to know into the handoff. A change that is live but undocumented is an unfinished change.

SECTION 11

Rules that never bend.

1. **Builder claims are claims until verified.** Advertised prices are floors. Printed deadlines are opening positions, not facts.
2. **Every published number carries a date and a source.** If it cannot be verified, it is labeled that way or it does not run.
3. **The internal stays internal.** The Dispatch Data Console, the concession reality ledger, Concession Verification, team pages, and this guide never appear on the public site or in public posts.
4. **No MLS listing-level data on New Home Dispatch** until the licensing answer arrives in writing. Aggregates of five or more records only, and only on internal dashboards until then.
5. **No deal statistics under five comparable deals.** Small samples mislead buyers, and misleading buyers is the one unforgivable sin here.
6. **Consent and dignity.** Never publish consent-restricted media of identifiable people. No covert recording, anywhere, ever.
7. **Corrections are published, not buried.** The corrections log is a trust asset: [/corrections.html](#).
8. **The wall stands.** Research is never shaped by revenue. No builder pays to appear, no ranking is for sale, and the Seider Realty side never edits the Dispatch side.
9. **Data discipline.** The registry and the tape publish together or not at all; the consistency gate exists so a half-updated site can never ship.
10. **Write like a person.** Plain language, no hype, no em dashes in buyer-facing copy, and every sheet orients its reader: what this is, why it matters, how to use it.

When in doubt: ask what serves the buyer's decision, then do that. Every rule above is that sentence applied to a specific situation.

SECTION 12

Your first week.

- **D1 Set up:** home-screen the Toolbox, the team hub, and the current route page. Read this guide and How We Evaluate.
- **D2 Learn the products:** read three days of Hot Sheets, run the True Cost Calculator on a real listing, and search the tracker for two builders.
- **D3 Shadow the data:** watch a sweep land (6:30a, 10:30a, 2:30p, 6:30p CT) and see the homepage snapshot change. Open the Share Kit after it.
- **D4 First field day, accompanied:** two stops, full kit, file both visits before leaving each community.
- **D5 Closeout and review:** finish your filings, walk your findings against the tracker, and note what you would ask differently.

Glossary, the short version

Buyer Advantage Score	0 to 100 leverage read; above 65, buyers lead.
Concession Index	Median advertised credit across the tracked tape.
The tape	Our verified, time-stamped record of every tracked offer.
Tracker vs field verified	Website-checked versus confirmed in person, in writing.
QMI	Quick move in, a completed or near-complete home a builder is carrying.
MUD / PID	Special tax districts; the Atlas explains both and how to verify a lot.
Lender tie	An incentive that requires the builder's mortgage company.
Forward commitment	A builder-purchased block of below-market rate money, a real fixed rate, not a teaser.
Expired but displayed	An offer still advertised past its own printed deadline. We flag it by builder.
Deadline credibility	Our running record of whether a builder's deadlines hold, roll, or quietly vanish.

Edition 01, July 2026. This guide regenerates as the operation grows; the current edition always lives in the Toolbox and in Drive, 02 - Field Reporting. Questions go to Pete.
